INTRODUCTION

The Wallace Group is a privately owned Pharmaceutical & Biotechnology Group headquartered in Goa, India.

Incorporated in the late 1960s as a joint venture with Carter Wallace Inc. and Menezes family, the Wallace Group is primarily engaged in the manufacture and marketing of formulation products in India as well as abroad.

The Wallace Group employs over 2300 personnel with offices and facilities in several key locations in India and around the world. The Wallace Group comprises of Wallace Pharmaceuticals, Wallace Laboratories, Indi Pharma, GoodWinBio Tech and Trusts.

OUR PRODUCTS

Every day, millions of people enjoy the benefits of products from the Wallace Group.

Your health and well-being is our passion. That's why we offer a broad range of affordable pharmaceutical products, ranging from antibiotics and gastro-intestinal products, to products for skin care, diabetes, rheumatoid arthritis and scores of other serious conditions.

QUALITY CONTROL

We believe total quality control in everything we do, including extensive quality control tests at the modern and well-equipped laboratory at each factory site. The Wallace Group also has a centralized QC laboratory in Ponda, Goa, accredited by Government of India, guarantees that all products are manufactured as per stringent pharmacopoeial specifications.

ISO 9001:2008 Certification: Wallace Pharmaceuticals is an ISO 9001 certified company. This International standard specifies quality management system requirements required, where a manufacturer's capability to design and supply conforming products is demonstrated. These specifications are aimed primarily at achieving customer satisfaction by preventing nonconformity at all stages.

ISO 14001:2004 Certification: Wallace Pharmaceuticals is an ISO 14001 certified company. This International standard specifies environmental management systems requirements required. The Company is environmental conscious and firmly believes in conservation of natural resources such as water, oil and prevention of pollution through management of waste generated in the company.

All the manufacturing facilities are not only WHO-GMP compliant but are also approved by regulatory bodies of India and the respective countries.

OUR VISION:

To be a global leader in affordable niche healthcare solutions.
Available to anyone, anywhere in the world.

OUR VALUES:

To conduct our business with integrity, honesty and transparency.
To create and maintain best in class standards across all areas of work.
To encourage mutual trust, respect and team-work.
To develop customer focused systems and practices.

Chairman's Message :

“

”

India is currently charging ahead into mainstream pharmaceutical markets around the world with many companies taking their operations worldwide. It is a well-accepted fact that to grow and prosper, Indian companies will have to re-think the current business models and move to more global, innovation led growth. That is what we are attempting to build here at Wallace.

The Wallace of tomorrow will have a business presence in many markets of the world across the fields of pharmaceuticals and biotechnology.

In India, we are working towards retaining and growing our position of market leadership in key therapy areas with strong prescription driven sales. We will continue to make considerable investments in product innovation to strengthen our pipeline of affordable niche products for Indian and international markets. Our international markets for pharmaceutical products now include several emerging country markets in Asia, Africa and South America. We expect the international component of our pharmaceutical business to grow significantly in width and depth in the years come.

We were the first Indian company to acquire a biologics company in the US. Goodwin Biotechnology Inc. is a biologics services company with considerable experience in the manufacture of monoclonal antibodies and recombinant proteins with clients in the US and Europe.

Looking ahead we are determined to achieve our goal of becoming a force in affordable, niche healthcare solutions. And to do this we will continue to capitalize and build on the unique fundamentals of our group values, people and products by encouraging innovation, entrepreneurship and growth.

Sincerely,

Cesar Menezes
Chairman

Control Sugar level with...

ACARWAL™ $\frac{25}{50}$

Acarbose 25mg /50mg Tablets

Acarbose is used with a proper diet and exercise program to control high blood sugar in people with type 2 diabetes. Controlling high blood sugar helps prevent kidney damage, blindness, nerve problems, loss of limbs, and sexual function problems. Proper control of diabetes may also reduce your risk of a heart attack or stroke. Acarbose works in your intestines to slow the breakdown and absorption of carbohydrates from foods that you eat. This effect helps to reduce your blood sugar rise after a meal.

- ♥ Belongs to a class of drugs called HMG-CoA reductase inhibitors is a member of the drug class of statins.
- ♥ Works by blocking an enzyme that is needed by the body to make cholesterol, so this reduces the amount of cholesterol in the blood.
- ♥ Used together with diet, weight-loss, and exercise to reduce the risk of heart attack and stroke and to decrease the chance that heart surgery will be needed in people who have heart disease or who are at risk of developing heart disease.
